Methods of calculating the coefficient comparison of indicators to measure the ratings of the educational activities of Russian universities faculty. Comparing ratio value is calculated by the formula:

$$K_{cp_i} = \frac{\textit{Basic indicator value}}{\textit{indicator value}_i}$$

Where  $K_{cp}$  - the comparison factor,  $i$  - number of the indicator.

**Table 1.** Indicators of discipline teaching of the faculty evaluation rating system for universities studied.

Indicator	The weight coeff.	Point for 1 unit	In total	Kcp	Basic Indicator
Indicator 1 <sup>a</sup>	0.1		0.1	0.02	6
Indicator 2 <sup>b</sup>		100	100	1.00	100
Indicator 3 <sup>c</sup>		100	100	1.00	100
Indicator 4 <sup>d</sup>		200	200	0.80	250
Indicator 5 <sup>e</sup>		25	25	0.13	200
Indicator 6 <sup>f</sup>		20	20	0.10	200

<sup>a</sup> Lectures or classes in video format loaded on the public information space (on site). Southern Federal University

<sup>b</sup> The presence of non-standard innovative educational products (objects), including those developed in cooperation with employers (video lectures, trainings, business games), including products in foreign languages. Immanuel Kant Baltic Federal University.

<sup>c</sup> The presence of non-standard innovative training products developed using acquired new laboratory equipment, advanced software. Immanuel Kant Baltic Federal University.

<sup>d</sup> A complete cycle of lectures and workshops on the subject in the inter-institutional level. Immanuel. Ural Federal University.

<sup>e</sup> Participation in the implementation of training programs on the second official language. Kazan State University of Architecture and Engineerin.

<sup>f</sup> Occupation by teachers the prizes at the Republican and city contest "The best teacher" Kazan State University of Architecture and Engineerin.
